

JAY JOSHI

Engineering Leader – AI Platforms, AI Automation & Digital Transformation

■ PROFESSIONAL SUMMARY

Engineering and cybersecurity leader with strong experience building AI-driven platforms, automation, and scalable global security operations. Experienced in client-facing solution engineering, pre-sales, and translating complex technical challenges into ROI-driven outcomes. Hands-on in developing RAG-based AI models, intelligent automation, and decision-driven response systems across SOC, SIEM, and XDR environments.

■ EXPERIENCE

Proficio | San Diego, USA

Sept 2024 - Present (VP, Global Engineering and Managed Services)

- Leading AI-driven automation across SOC, SIEM, XDR and EDR platforms
- Built RAG-based AI workflows for enrichment, detection and response
- Driving 60–70% reduction in manual effort via automation
- Founded Managed XDR Service offering for Proficio (Cisco XDR & Palo Alto Cortex XDR)
- Conducting client discovery and transformation workshops
- Translating solutions into ROI-driven business outcomes
- Supporting multi-million dollar deals and global sales initiatives

I played a pivotal role at Proficio, focusing on supporting global customers managing their cybersecurity infrastructure. I strengthened security postures and designed environments using existing tools or Next-Gen solutions. Additionally, I contributed to global sales by promoting MEDR services for EDR and MSS Services. As a VP, I led a team, closing deals worth millions. In Singapore, I initiated Cyber Exposure Monitoring and ProBAS along with other Managed services, driving millions in sales for Proficio's. I also established a technical team of 20 and multiple managers, addressing global staffing needs and providing essential skills support across departments.

Jan 2023 - Sept 2024 (Global Director, Managed Infrastructure Services)

- Led global solution engineering and automation initiatives
- Enabled AI-assisted workflows and SOAR-driven operations
- Partnered with executives and sales for multi-million deals

Started with Proficio as a Security Engineer, overseeing firewalls and EDR tools like Carbon Black and TrendMicro. Through several promotions, I advanced to roles such as Security

Engineer II, Security Engineer III (Dec 2019 - Oct 2020), Lead Managed Infrastructure Engineer (Oct 2020 - Jan 2022), and Global Manager (From Jan 2022- Jan 2023), MIS, finally attaining the position of Global Director of MIS. In my current role, I assist Proficio customers in managing their infrastructure, enhancing cyber security postures, automating global security operations via SOAR and architecting secure environments. My contributions include supporting global sales by promoting MEDR services for EDR and NGFW tools. As a Global Director, I directly manage a team, successfully closing deals valued at over a couple of million dollars along with working with global sales leadership, executives and board members.

Jan 2022 - Jan 2023 (Global Manager, MIS)

Oct 2020 - Jan 2022 (Global Lead, MIS)

Dec 2019 - Oct 2020 (Security Engineer III)

July 2017 - Oct 2020 (Security Engineer I-II)

Started with Proficio as a Security Engineer, overseeing firewalls and EDR tools like Carbon Black and TrendMicro. Through several promotions, I advanced roles while assisting customers in managing infrastructure, enhancing security posture, and architecting secure environments. I supported global sales and managed teams delivering multi-million dollar outcomes while solving technical and operational challenges.

Cisco Systems | San Jose, USA

April 2016 - April 2017 (Security Engineer)

As an adept cybersecurity professional, I excel in testing and analyzing devices for traffic behavior using Spirent and IXIA-Breaking Point. My skills extend to developing processes for parsing corporate firewall settings into multiple file formats. I bring expertise in various penetration tests, including host, network, and web application, along with analyzing malware behavior and security incidents.

Adxor Technologies Ltd | Mumbai, India

March 2012 - Nov 2014 (Network Engineer)

Experienced Network Engineer specializing in configuring and installing diverse network devices (routers, switches, firewalls, Load balancers, VPN, QoS). Proven ability to monitor performance, ensuring system availability and reliability. Skilled in Level-2/3 support, adept at troubleshooting data network faults in local and wide area environments. Proficient in securing networks through policy establishment, access monitoring, and firmware upgrades. Capable of remote troubleshooting and fault finding during initial installations

■ EXPERTISE

AI Platforms, RAG Models, Agentic Automation, Intelligent Automation, AI Strategy, SOC Operations, SIEM (Sentinel, Splunk, QRadar), XDR (Cisco, Cortex), EDR (CrowdStrike, SentinelOne, Defender, Carbon Black, TrendMicro, Sophos), SOAR (FortiSOAR, Tines, Cortex XSOAR), Threat Detection & Response, Incident Response, Threat Intelligence, Cloud Security (Azure), Network Security, NGFW (Palo Alto, Cisco, Checkpoint, Fortinet), Digital Transformation, Solution Engineering, Pre-Sales, Technical Sales, Executive Communication

■ EDUCATION

PhD in Cybersecurity (On Hold)
Masters In Cybersecurity
Masters In Computer Science
Bachelors in Computer Engineering
Associate Degree in Computer Engineering
